Summery

Experienced back-end developer specializing in Node.js, with expertise in frameworks such as Nest.js and Express.js. I have 3 projects that demonstrate my expertise in backend development. Proficient in databases including MongoDB and PostgreSQL, I possess strong problem-solving skills and a creative mindset. Equipped with excellent soft skills, I am adept at collaborating with teams and delivering high-quality solutions.

Projects

Ajirni.com

Technologies: Nest.js, PostgreSQL, TypeORM, Typescript, Nodemailer   **Demo**   **Src**

- Ajirni.com is a user-friendly rental platform
- Individuals can easily list their items for rent to earn extra income
- Users can search for and rent items by filtering based on item name, price range and location
- Make money by renting out your items or find what you need conveniently

NOVA Market

Technologies: Express.js, MongoDB, Mongoose, Morgan, Nodemailer   **Demo**   **Src**

- NOVA is a top market where you can easily search for products by name, category, or brand
- Choose your preferred price range, best sellers, or most liked items
- Add products to your cart, apply a coupon, select a shipping address, and pay with cash or credit card
- Leave reviews with star ratings and comments on any product

ChatMe

Technologies: Express.js, MongoDB, Mongoose, Websocket, Html, Css, Js   **Demo**   **Src**

- Sign up / Log in for Real time messaging
- Discover new friends or search for your friends
- Block bothering people (and unblock any time you want)
- Know the online people and if they are typing to you

Education

Damascus University

BSc Degree in Computer Science - Third Year Student   *Aug 2021 - present*

Certificates

- **Damascus Collegiate Programming Contest (DCPC)** **Link**

  By ICPC Organization

- **Ramadan Hackathon Event** **Link**

  By Arab American Society for Education and Development

Skills

- Node.js | Nest.js | Express.js
- TypeOrm, Mongoose, Sequelize
- JWT, Sessions, Passport
- RESTful API, Websocket
- Html, Css, Js, React (Basics)
- Databases: PostgreSql, MongoDb
- Algorithms and Data Structure
- RDBMS Architecture
- OOP, SOLID, Design Patterns
- Competitive Programming (Solving +700 problems)
- Version Control: Git / GitHub
- OS Architecture

Languages

- Arabic: Native
- English: Very Good
